ERPNext Expert | Software Engineer

Islamabad, Pakistan | +92 313 7580444 | abbasraza0444@gmail.com | linkedin.com/in/abbas-raza-b1541616a | github.com/abbas0444 | abbas0444.github.io

PROFESSIONAL SUMMARY

ERPNext Expert and Software Engineer with 6+ years of experience designing, developing and maintaining enterprise web applications and ERP systems. Specialist in the Frappe Framework and ERPNext (custom DocTypes, server and client scripts, reports, print formats, workflows, integrations, upgrades) with a strong PHP background in CodeIgniter and Laravel. Delivered national healthcare platforms for government clients and currently own a multi-company, multi-currency ERPNext implementation for a global haircare brand, including payroll reporting and payment gateway integration. Author of two open-source apps published on the Frappe Marketplace. Focused on clean, maintainable code, performance optimisation and reliable business solutions.

TECHNICAL SKILLS

ERP & Frameworks: Frappe Framework, ERPNext (v13 to v16), Frappe HRMS, CodeIgniter, Laravel

Languages: Python, PHP, JavaScript, SQL, HTML5, CSS3

Frontend: jQuery, Angular, AJAX, Bootstrap, Frappe UI

Databases: MariaDB, MySQL, PostgreSQL, stored procedures, query optimisation

Cloud & DevOps: AWS, Microsoft Azure, Frappe Cloud, Linux, Bench, Git, GitHub, CI (GitHub Actions)

ERP Domains: Accounts, Selling, Buying, Stock, Subcontracting, HR & Payroll (tax, EOBI, provident fund), Multi-currency, Multi-company

Integrations: Payment gateways (EMS card payments, tokenisation), Flexport API, Google Sheets, ZKTeco biometric devices, REST APIs

Practices: REST API design, authentication systems, reporting dashboards, print formats, workflows, code review, documentation

PROFESSIONAL EXPERIENCE

ERPNext Expert

GK Hair International, Islamabad, Pakistan | **Jun 2026 – Present**

- Own the ERPNext v16 platform for a multi-company, multi-currency professional haircare business covering Accounts, Selling, Buying, Stock, Subcontracting and HR/Payroll.
- Build and maintain the company's custom Frappe app: desk-wide company filter, monthly exchange-rate automation, payroll income-tax slab currency conversion, Payment Request to Payment Entry automation, GL against-account enrichment and nightly off-bench backups.
- Deliver custom reports used daily by finance and operations: Bank Balances with Google Sheets bank entries, Warehouse-wise Stock including Amazon FBA, and live 3PL inventory from the Flexport API.
- Built the payroll statutory reports: Employee Taxable Salary, Withholding Tax on Salary, EOBI Details and Provident Fund Details, with selectable employee columns, employer and employee splits per month, opening balances and annual totals.
- Built a card-payment integration with the EMS payment gateway: charge from a Sales Invoice, Sales Order or Payment Request, signed customer pay links, refunds, voids and hourly sync, with card data tokenised in the browser so it never reaches the ERP.
- Design print formats (Proforma Invoice, Commercial Invoice) and Desk UI improvements; manage production, staging and development sites: upgrades, migrations, fixtures, patches and day-to-day user support.

Software Engineer

Micromerger Pvt. Ltd, Islamabad, Pakistan | **Jul 2021 – Jun 2026**

- Designed, developed and maintained scalable web applications using PHP, CodeIgniter, Laravel, Angular, JavaScript, jQuery, AJAX and MySQL, deployed on Azure and AWS.
- Developed and modified DocTypes, custom scripts, reports, print formats, workflows and server scripts in Frappe/ERPNext for enterprise clients.
- Led development of ICIMS, a case management system on Frappe/ERPNext, and IDIMS, a national disease surveillance system on CodeIgniter.
- Provided technical support, bug fixing and continuous enhancement for live applications and ERP systems.
- Created and optimised SQL queries, stored procedures and reports to meet business reporting requirements.

Associate Software Engineer

Maildaddy.io, Rawalpindi, Pakistan | Mar 2021 – Jun 2021

- Developed responsive, user-friendly interfaces for web applications.
- Integrated REST APIs and third-party services into existing products.
- Supported deployment and server-side configuration in development and staging environments.
- Implemented CRUD operations, form validation, authentication and database integration.

Associate Software Engineer

Pace Technologies, Islamabad, Pakistan | Mar 2019 – Feb 2021

- Participated in code reviews, testing, deployment and maintenance activities.
- Maintained project documentation and ensured coding standards and best practices were followed.
- Built responsive web interfaces and collaborated with senior developers to analyse requirements and deliver solutions.

OPEN SOURCE CONTRIBUTIONS

Nexus Theme

Frappe Marketplace | Author and maintainer | github.com/abbas0444/nexus_theme

Theme Studio, Sound Studio and a Permission Inspector for the Frappe/ERPNext Desk: 17 bundled themes, live colour editor with WCAG contrast checks, Ctrl+K command palette, density modes, sidebar skins and a themed login page. Rated 5.0 on the Marketplace; builds for Frappe v15 and v16.

Technologies: Python, JavaScript, CSS, Frappe Framework

Nexus ZKT Integration

Frappe Marketplace | Author and maintainer | github.com/abbas0444/nexus_zkt_integration

Pulls attendance punches from ZKTeco biometric devices directly into ERPNext Employee Checkin across multiple doors, with hourly background sync, a full activity journal, safe device-memory clearing and 106 automated tests.

Technologies: Python, Frappe HRMS, ZKTeco SDK, GitHub Actions CI

KEY PROJECTS

EMS Payment Gateway Integration

Developer | GK Hair International

Frappe app for card payments in ERPNext v16 through the EMS payment gateway: one-click charge with automatic Payment Entry, signed pay links customers open without logging in, refunds and voids, and an hourly sync that reconciles gateway transactions. Card fields are tokenised in the browser, keeping card numbers off the server.

Technologies: Frappe Framework, ERPNext, Python, JavaScript, payment gateway API

ICIMS – Integrated Case Information Management System

Lead Developer | icims.mmis.space

Centralised case management and information system to manage, track and monitor organisational records, workflows and reporting, with automated workflows and real-time reporting.

Technologies: Frappe Framework, ERPNext, Python, MariaDB, JavaScript, HTML/CSS

IDIMS – Integrated Disease Information Management System

Lead Developer | idims.eoc.gov.pk

Healthcare management and disease surveillance system for Pakistan's Emergency Operations Centre, streamlining disease data collection, reporting and analytics for health departments.

Technologies: Codelgniter 3, MySQL, JavaScript, jQuery, Bootstrap, HTML/CSS

EPIMIS – Expanded Program on Immunization Management Information System

Web Developer | epimis.pk

Immunization management information system supporting vaccination data management, reporting and monitoring, improving immunization workflows and access to healthcare information.

Technologies: Codelgniter 3, PostgreSQL, JavaScript, jQuery, Bootstrap, HTML/CSS

EDUCATION

Bachelor of Science in Computer Science

PMAS Arid Agriculture University, Rawalpindi, Pakistan
